Stakeholder engagement planning helps you identify and classify stakeholders in the FSM ecosystem based on their level of interest and influence. It also provides broad guidelines for engagement for each category of stakeholders. Stakeholders offer value to their local FSM ecosystem in the following ways:

- Play a vital role across the FSM value chain (construction of toilets/desludging services/treatment/sale or safe disposal of treated sanitation products) such as infrastructure development, service delivery, planning, financing, regulation, capacity building, monitoring, IEC/BCC.
- Be a beneficiary at any part of the value chain.
- Learn/support/oppose the overall implementation of the FSM project.

Interest-Influence Mapping

The scoring scale for Interest and Influence of FSM stakeholders consists of 6 levels - Unknown, Little or None, Some, Moderate, High and Crucial.

Interest is characterized by the stakeholders' needs, constraints and problems being a priority in the FSM strategy. **Influence** is the power that stakeholders have on the project i.e. in terms of controlling the decision-making process and facilitating the implementation

You can view the relative positioning of the stakeholders in the Interest-Influence Matrix based on the rating given online in the following figure.

Recommendations

The stakeholders are classified into four groups based on the positioning in the interest-influence matrix. A set of guidelines for collaboration for each category of stakeholder are provided below.

High Interest + High Influence

These stakeholders should be closely involved throughout the preparation and implementation of the project to ensure their support for the project. It is recommended that these stakeholders are utilized for Consultation, Collaboration & Delegation of responsibilities. In your local scenario, they are:
